Appendix B: Social Hostilities Index

The following table shows all 198 countries and territories in descending order of their scores on Pew Research Center’s index of social hostilities involving religion as of the end of 2018. The Center has not attached numerical rankings to the countries because there are numerous tied scores and the differences between the scores of countries that are close to each other on this table are not necessarily meaningful.

NORTH KOREA: The sources used for this study clearly indicate that the government of North Korea is among the most repressive in the world with respect to religion as well as other civil liberties. But because North Korean society is effectively closed to outsiders, the sources are unable to provide the kind of specific and timely information that Pew Research Center coded in this quantitative study. Therefore, the report does not include a score for North Korea on either index.

YEMEN: Starting with data covering 2016, researchers changed the way they coded social hostilities in Yemen. See the Methodology for more details.
